## Stacey,

I would like to offer a comment on the following statement in the draft letter below. "Based on the data provided by UEC from pump tests and ground water elevation data, the four sands are expected to be hydraulically isolated from existing water wells, and the ground water in the area flows away from the wells. Additionally, the tests found that ground water does not flow from the mining area to existing water wells."

Ray Leissner, Env. Eng. Ground Water / UIC Section (6WQ-SG) (214) 665 - 7183 USEPA, Region 6

The FIRST STEP in protecting your ground water is to have your well tested.

Subject: Letter to Citizens of Goliad County

Here is a rewrite of the original letter to the citizens. I've incorporate all your comments. Let me know what you think.
